

Dear Friends of the Unborn!

It's hard to believe we are at 6 months already! We continue our prayers for these little ones whose birth is only 3 months away.

Month 6

Your baby's skin is reddish in color, wrinkled, and veins are visible through the baby's translucent skin. Baby's finger and toe prints are visible. The eyelids begin to part and the eyes open. Baby responds to sounds by moving or increasing the pulse. You may notice jerking motions if baby hiccups. If born prematurely, your baby may survive after the 23rd week with intensive care. By the end of the sixth month, your baby is about 12 inches long and weighs about 2 pounds.

20 weeks
